In this talk we shall discuss basics of Topological Spaces.

What is topology? Topology is a study of continuous functions from a set A into a set B .

What is a continuous function? A function f is continuous if **small change(closeness) in the inputs leads to small change(closeness) in the outputs.**

Thus we should have some way (or mechanism) to measure these changes in the domain and the codomain.

- [1] If A and B are subsets of $\mathbb{R}$, closeness of the objects is measured with distance function.
- [2] If A and B are subsets of Euclidean spaces $\mathbb{R}^n$, closeness is measured with euclidean distance.
- [3] If we do not have euclidean distance, we go to the concept of metric to measure the closeness of the objects.

A Report of the Inauguration function of the Mathematics Association was held on Friday 8th January 2021. The Inauguration function of the Mathematics Association was held on Friday 8th January 2021 at 04.00pm in Google meet link.

Meet Link: <https://meet.google.com/lookup/c7dkeoai5>

The function started with a Prayer song. The august gathering was formally welcome by Prof. A. Arul Xavier, Co-ordinator (Shift- II), Department of Mathematics. St. Joseph's College, Trichy-620 002. Rev. Dr. S. Peter SJ, The Secretary, St. Joseph's College presided over the function. Dr. V. Alex Ramani, The Deputy Principal, St. Joseph's College felicitated this function. Dr. A. Jeny Jordon, Association President gave a brief introduction about the guest speaker of this inauguration. The inaugural address was delivered by Dr. A. Lourdasamy, Associate Professor, Department of Mathematics, St. Xavier's College (Autonomous), Palayamkottai, Tirunelveli, on the topic "**APPLICATIONS OF MATHEMATICS**". He clearly explained about the application of mathematics to science and technology- Rocketry science using Newton's Law of Motion. He gave us example of a balloon. The air inside a balloon is compressed by the balloons rubber walls. The air pushes back so that the inward and the outward pressing forces are balanced. When the nozzle is released, air escapes through it and the balloon is propelled in the opposite direction. There is strong similarity between two. He elaborated, but there is difference. Newton's law is very important as they tie into our everyday life. He showed us that all three laws are simple statements of things move. But with them, precise determinations of rocket performance can be made. The Master of ceremony was done by Prof. P. Joyal Roy, Assistant Professor, Department of Mathematics (Shift-II). The programme was ended by vote of thanks.
