REPORT ON VALUE ADDED COURSE ON DATA ANALYSIS USING SPSS

LEARNINGS:

Data classification:

Initially we were thought the classification of data. Data is classified into quantitative and qualitative data. Quantitative data is again classified into categorical and ordinal. Qualitative data is again classified in to interval and ratio.

In order to test our understanding sample questionnaires were issued and we were asked to find the category of data.

Review of literature:

- Research topic was selected namely “online class and it’s overview”.
- We divided the topic into demographic information, challenges in online classes, advantages of online classes, disadvantages of online classes in order to draft the questionnaire.

Questionnaire preparation:

Questionnaire consisting of 56 questions was prepared.

Data collection:

The target population was college going students who were attending online classes due to COVI-19 pandemic. Each of us took 10 copies the questionnaire and collected data from friends, neighbours , relatives and juniors in college.

Import to excel:

The collected data was imported to excel.

Import to SPSS:

- Data in excel was feed in SPSS under “data view”
- In “variable view” questions was entered in short form under the heading label.
- In “value label” the options was coded with numeric value.
- Under “measure” scale/ordinal/nominal is selected for each and every question.
