He shared his life experience and the skills he learnt in Africa which helped him to manage life better and stay happier. He explained that people should retain at least some features of their traditional cultures. Opponents say that multiculturalism threatens the social order by diminishing the identity and influence of the predominant culture. While acknowledging that it is a sociopolitical issue, this article will focus on the sociological aspects of multiculturalism. He

improved the students' level of knowledge about multiculturalism and he also spoke about the significance of football In Zambia and the love and respect they give towards it. Though the development of Africa is 50 years behind India, he showcased the significance of their inner beauty.
