ABOUT TIRUCHIRAPPALLI

It is Tamil Nadu's fourth largest city. It is situated in the centre of the state, on the southern bank of the River "Cauvery". Trichy is a City Corporation. The most famous landmark of Trichy is the Rockfort temple which is perched on a huge rocky out crop. Tiruchirappalli city encompasses Srirangam, a Vaishnavite temple and the biggest functioning Hindu temple in the world. Tiruchirappalli also contains "Thirunaikka", House of Water, one of the five main abodes of Lord Shiva. The College houses the famous "St. Lourdes Church" with sky high steeple known for its ambience and architecture. Tiruchirappalli has a moderate and pleasant climate, with humidity slightly above normal. The city experiences mild winters and humid summers. The timing of the monsoon in this part of the country has lately become unpredictable, with the rainy season starting from mid-October until early-November and the rains then extending until early or mid-January. The climate will be very pleasant during the month of March. In addition, the city is closer (15 km) to two thousand years old Grand anicut which saves and distributes water for irrigation from the river Cauvery to the tail end of the delta.

HOST INSTITUTION

The Dodransbicentennial St. Joseph's College has always upheld and radiated Goodness and Truth in its endeavour to impart quality higher education. This educational establishment has been instrumental in churning out thousands of truly educated men; not only physically fit, but intellectually well equipped; nor merely cultured and refined but thoroughly schooled and disciplined. Thus this College stands for what is best in education. Crystallized in its glorious motto 'Pro Bono Et Vero' - (meaning "For the Good and the True") truly upholding the glory and honour it richly deserves, testified by time and history.

HOST DEPARTMENT

The post graduate Department of Biochemistry was started in the year 1993; from then it is imparting quality education in the field of life sciences. It has excellent infrastructural facilities to cater to the needs of the students. The teachers excel both in teaching and research. The thrust areas of research are antioxidant studies, cancer biology, cardiac biology, enzymology, phytotherapy, microbiology, histopathology and pharmacology. The department has organized workshops and seminars in the yester years in association with the other related departments. It has got many of its alumni well placed in India and abroad.

SCOPE OF THE CONFERENCE

For patients with severely damaged organs, who are on a waiting list for a transplant, the availability of artificial organs could be the only way to survive. One way of creating artificial organs is the use of cell therapy and / or tissue-engineering techniques. How such artificial organs are made? What are the construction materials and procedures concerned? What are the technical difficulties and constraints? What are the solutions for those constraints? How these systems can be used for drug testing and discovery? All these make up the theme of this National conference on "Advances in artificial organ development and current strategies in drug discovery". The department of Biochemistry takes pride in deliberating the current strategies in the production of Microphysiological systems which encompasses organs on chip.

THEME OF THE CONFERENCE

- 1) Animal Cell culture techniques : viability, toxicity testing, production of pharmacologically important products, culture media development and engineered cells
- 2) Chip development and applications
- 3) Biopolymers used in the tissue constructs
- 4) Drug testing
- 5) Pharmacology and Pharmacotherapeutics
- 6) Cell sorting
- 7) Artificial Organogenesis
- 8) Microphysiological systems
- 9) Oncology and carcinogenicity testing
- 10) 2D and 3D Organ culture and models

FIXATION

This is the process by which cells and tissue are fixed in a physical and chemical state so that they will withstand subsequent treatment with various reagents with minimum loss of architecture.

This should be approximately 10-20 times the volume of the specimen. Fixative should surround the specimen on all sides.

Good fixative solutions:

1. formaldehyde
2. alcohol
3. picric acid
4. potassium dichromate etc.

REPORT ON DR.T. SUNDARARAJ'S ENDOWMENT LECTURE

"As Knowledge increases, wonder deepens"

-Charles Morgan

The Department of History, St. Joseph's College never fails to inhibit knowledge along with wisdom to the students. Habitually, an endowment lecture was arranged by our department. Dr. T. Sundararaj's Endowment Lecture was wisely used by our department in this regard for quenching the knowledge thirsts of us. Our department have been monumental for conducting various scholarly and academic programmes. In this case, Our Head of the Department, Dr.S.Santhosh Kumar and Association President, Dr.S.Manikandan has orchestrated an lecture on Recent Archaeological Excavations in Tamil Nadu by the proficient lecturer Dr.V.P. Yathees Kumar , Assistant Archaeologist, Archaeological Survey of India, Trichy Circle, Tiruchirappalli. As usual. Our department has a deeply contributed for the well being of the lecture. A well-matured co-ordination was maintained by the students and staffs for a fair event. The date of the lecture was chosen at 11th January and time is scheduled to 11 A.M. The venue for the scholarly session is the Sail Hall. The lecture is to be presided by our Principal, Rev.Dr.M. Arockiasamy Xavier. SJ.

The Endowment Lecture was sharply started at 11.35 A.M. All the department staffs and students engaged in the event and gathered neatly at the venue. The devotional prayer song initiated the knowledgeable session. Those 5 minutes of keen devotion helped us to refresh our minds and to stay straight focused on the lecture. Then the heartily Welcome Address was given by our head of the department. He said that there has been a lot of controversies in the Peninsular India's historians. The biased nature of the North-Indian historians and the hypothesis of South India's history was explained by him. The new discoveries and excavations in Porunthal, Kodumanal, Adichanallur, Sivakalai, Keeladi has been influential in rewriting the history of Tamilnadu towards the world. The Excavational activities done

by Alexander Rea in 19th century to Yathees Kumar in present scenario has cleared out that there is an tremendous and valuable information hidden underground in Adichanallur. Then, he warmly welcomed the organizers and students for their presence and praised Mr. Yathees Kumar with the bottom of the heart.

Then the Resource person was introduced by Dr.T.Beatala Amalorpava Mary. He had been very adept and skillful from his student days. He had gained knowledge from various Universities. He had been an expert in doing Project works especially in River valleys and deltaic regions. The Chera country project, Sangam Age, Porunthal, Pudukkottai, Dindigul, Thoothukudi and many cultural information had been exposed by him with his tremendous efforts. He had been instrumental from the year 2009 till now, Iron Age, Hero Stones in Thamirabarani, Pullimancombai, and a long list of achievements and his explorations in various places made us awestruck.

Finally, the time has come for the intellectual session. The Resource person thanked everyone for the wonderful address and initiated the lecture with a strong welcome. He began to say that the Archaeological department has been rendering their service in preserving and conserving the priceless treasures i.e. "artefacts". He said that there are about 4000 monuments across India and 411 monuments in Tamil Nadu being recognized and conserved. He stated that these monuments in Tamil Nadu are divided and looked after by many units and organisations, but officially administered by two administrative units namely *Northern Part and Southern Part*. The Northern part is called on by Chennai circle and the south by Trichy circle. Around 23 districts are included in the Trichy circle. He then asked us about the World Heritage sites in Tamil Nadu. Everyone replied with mixed answers and got baffled, but he clarified it, saying that there are only two i.e. *The Great Living Chola Temples and the Group of Monuments at Mahabalipuram*. Then, the real topic of lecture started with a slide for a better pictorial representation and understanding. He explained the place, its history and exact location of Adichanallur

first and showed us the satellite view of it. The Research began in Adichanallur and was failed but after severe efforts it has been resumed for the second time which has been a huge success now. The physical geography of the place and geological nature of Adichanallur was thoroughly elucidated by him. He referred to the Sangam information of Pandyas Trade with Romans, the Trade routes from Seas to Rivers. He revised us that the historical periods in India is classified into Proto, Pre, Early and Historical Eras. He questioned us about the lack of information from the transitional era and the students answered that the sources are non-readable and difficult to express and to decipher. He was so worried to say that this ancient piece of land, Tamil Nadu is not recognised because of our lack of sources from Iron Age, he was neither biased nor prejudice. Through this Archaeological research, he was very happy to inform that many sources from very old ages have been discovered and will be utilised for glorious recognition for Tamils. *"The places such as Arichaimedu, Amirthamangalam, Woraiyur are historically important places but Adichanallur is completely different and more valued because of its ancient past and sources. This place was civilized and was in continuous use by the people from Iron Age to Sangam Age".* The prt towns cities and Nagar from Vijayanagars are from the modern era but the term "U" had been under practice from very old ages. He showed us the pictures of Human remains from 1.7 million years ago. The Proto period is rich in history but the lack of readability of the Indus Scripts made us numb. The Archaeological idea in India was proposed by British officer Alexander Cunningham but it was by James Prinsep where it got prevalent.

The uniqueness of Adichanallur was expressed by him, the 125 acres of land is precious as each and every millimetres have a rich source of information. After a long break of 17 years, the Archaeological Survey of India (ASI) is all set to resume excavation at the Adichanallur archaeological site spread over 125 acres along the Thamirabarani river in Thoothukudi district, from Sunday. The exercise was much anticipated as the Union government had announced plans to establish an iconic world class on-site museum at Adichanallur, in February, 2020. Adichanallur site was first excavated by German archaeology enthusiast

Dr Jagor in 1876. British India's ASI Superintending Engineer Alexander Rea excavated the site between 1899 and 1905, and ASI Superintending Archaeologist Dr Sathya Murthy also probed the site in 2004-06. Additionally, many archaeologists had taken up antiquity exploration in the region. As the site was a burial ground for ancient settlers, the past excavations shed light on their funeral rituals, potteries, food habits, graffiti, and cultural practices. Following carbon dating, a potsherd collected from Adichanallur was found to be dating back to 905 BC. The State government has also initiated measures to explore how the ancient civilisation (Porunai river valley civilisation) flourished on Thamirabarani river banks.

"MONUMENTS AND ARCHAEOLOGICAL PIECES SERVE AS TESTIMONIES OF MAN'S GREATNESS AND ESTABLISH A DIALOGUE BETWEEN CIVILIZATIONS SHOWING THE EXTENT TO WHICH HUMAN BEINGS ARE LINKED."

-VINCENTE FOX

The artefacts collected by the German Archaeologists are preserved in the Berlin Museum even today. Alexander Rea from 1901 to 1902 to be exact excavated the 170 acres of land and he was astonished by those sources and artefacts. The Alexander Rea's map was showed for better clarity, and the Survey of lands, the site findings and Advanced technology such as GIS(Geographic Information System) helped him and his team to achieve map development in a crystal clear way. The sunburnt bricks are often very prone to be destroyed and it needed critical care and maintenance. He wondered that the Ceramics used by them are evident that they are very civilized and skilled. The backbone of Archaeologists is the rock, soil and carbon in which they can easily understand if the place was in use or not.

The highly elevated hillocks and ridges are used by the tamils in Adichanallur. He then provided the Statistical data of urns found i.e. 181 urns found in Adichanallur. The fragrance of the urns was of

pleasant pollen smell, dating proved that ancient people used well mannered aesthetics and cosmetics.

The lid of several pots are shown by him that even the sleepy ones could wake up, that the lids are of very accurate designs with horns of deer, carps jumping, peacock etc. The LiDAR(Light Detection and Ranging) really helped them for knowing the surface. Korkai sites were watched over by drone cameras, Sivakalai sites were rich in bronze coins. The ancient tamils really were much more skilled to chemically create bronze with mixed composition of Tin and copper. The Archaeological team would divide the place into several grids with an 10/10 metres dimensions and everyday only 5 centimetres of digging is allowed as daily limit. The brushes are very minute and precise and only trained professionals are allowed in excavations. The DNA samples of many urns are sent to microbiology and micro bio technology but only 2 out of 200 urns are only decoded but only with insufficient nucleic information. The Ancient tamils buried the dead into a pot which is famously known as Jar burial(Muthumakkal Thazhi) and is 15 ft deep with 9-12 feet circumference filled with 200 kilograms of paddy, some kgs of millets and grains, swords, birds, their belongings with the dead in a crouched position. He vividly explained to Principal's question that some Influential and rich people were only buried in a different position in those time. The leaders, warriors were of those persons. He said that the Archaeological team would divide the place of study into several quadrants, and into Three Localites namely A.B.C.

Soon, the Adichanallur is known to have an institutional museum along with it for public view. The Egyptian Pyramids are compared by him with the Jar burials of tamil in this regard. Dr. Yathees Kumar classified the Urn burials based on the shape and colours, he was very eager to share his experience with those artefacts study he has gained over years. He assumed that there must have been rituals for the dead where they would pour tonnes of food grains which shows their surplus amount of wealth. Many button shape pots, coloured pots, tripod stands along with aesthetic designs were excavated. The cross sectional diagram of the area was showed in the slide and the relativity between the Maharashtra's tripod stand and of Adichanallur was concluded that there must have been an import and export of goods. He said

that the silver urns are more resourceful than gold. Many herbal items and stands are shown over the slides, 3 long spears for survival, Mycenae civilizations similarity with tamils are discussed later by him. Iron horns, Gold fillets and double fish deigned stand are shown by him. The tin composition into making Sanauli mirrors clearly made us astonished, Manufacturing of goods to Mahurjhari, the white paintings on urns, Iron daggers with wooden handles were displayed as pictures. The Inlaid work in those material remains clearly proved that the Adichanallur and Porunai Valley Civilisation was of crucial one in changing the history of histories. He then finished the sessions with the pictures of turtle designed urns, graffiti marks and old anchors along with flexible modern bangles.

Then there came the interactive session where everyone seemed to be interested in discussing with the well experienced resource person, Dr. Yathees Kumar. Many students clarified their doubts with the future of Archaeology and its scope in present scenario. He answered in an elaborate way that we all clearly understood. He then was raised with a question that what was his favourite spot and topic of study in his experience, he was very objective in his experience but he was so eager in studying the bronze and alloy age of Tamil Nadu. Rev. Fr. Principal was so keen in asking questions that he had three questions and the resource person answered every three questions in an profound way. He also added that GIS, Accelerator Mass Spectrometry (AMS) Dating, Physical Anthropologists, DNA Analyst, Various Colleges and University from all over Tamil Nadu helped them relentlessly in summer times at 42°C. He also added that there will be an iconic site museum to be introduced soon by the Government.

Finally, he thanked each and everyone for helping him and his team to overcome the struggles in Adichanallur excavations, the College for arranging such an interesting lecture. He informed that this is an exclusive session that even the Report of the research is not yet issued by the Tamil Nadu Government. We are so lucky for this enthusiastic session and showed him our gratitude with a big round of applause.

The Vote of thanks was delivered and with that we quenched our thirst with sweet emerald drops of wisdom and knowledge.

A REPORT ON DR.M. ARUMAIRAJ ENDOWMENT LECTURE

An extension of the previous lecture on Archaeological excavations by Dr. Yathees Kumar was in a narrow need. Thus, the Dr.M. Arumairaj Endowment lecture was utilised for the knowledge development. The Date, Venue and Resource Person of the session was pre-determined by our Department Head and Assistant Professors,

at 9.00 am, 27th February 2024, Placement Hall, Hon'ble Dr. C. Thomas, Former Associate Professor and Head (Rtd), Thanthai EVR Periyar Arts and Science College, Tiruchirappalli. The Programme was presided by our Principal, Rev. Dr. M.

Arockiasamy Xavier, SJ. The works were done by the department Committee members for the prosperity of the programme. The programme started with a pious and devotional Prayer song followed by Tamil Thai Valthu. A very warm Welcome Address was given by our professor Dr. M. Britto Stalin on Historical Writing and use of sources, along with his personal admiration towards the Resource person. Our Department Head, Dr. S. Santhosh Kumar honoured the resource person. The Resource person was already well renowned to our department as he had done various lectures for our department. With his profound knowledge, he spoke on the topic "Archaeological Excavations from Adichanallur and Reconstruction of the History of Ancient Tamilagam". Dr. C. Thomas started the lecture with a hearty thanks for active performance of the department for skill enhancement. The meaning of the word 'Tamilagam' refers to the region of Tamil speaking people, No map is there for Tamilagam as it was and still vast. A historical account on Kadambas was referred by him. The Kumarikandam, a region swallowed by ocean, its remains under the sea from Kanyakumari's port with a distance of 22 k.m. SE was explained by him. He stated that these remains are sunken in sea for more than 2000 years. The need for Underwater Archaeology, the reference by Tholkappiyam on Kumarikodu (elevated hill) was validated. The destruction of Pandya's old capital Korkai to form the new capital Madurai was deeply linked by him for the examining of Sangam Age and its scripts. The scripts must have been 3000 years old or contemporary with Indus Valley scripts. The Tamil scripts should have been passed earlier as Oral forms before the arrival of scripts. V.A. Smith's discovery on

Thamirabarani, Adichanallur and his implication to write history from Kaveri but not from Ganges was stated by the resource person.

He also stated that the Carbon Dating of Adichanallur from 1921 indicated the place to be from the age of 815 to 615 B.C. However, the recent carbon dating proved that the age should be 1000 B.C or beyond that. The Sangam literature such as

Silappathikaram, Kalithogai, Natrinai and Purananuru was interpreted by him for a clear deciphering of the sources. The ASI's discoveries, their failed scientific research was depicted by him. The books by Tamilnadu Government 'Ongoing Excavations in Tamilnadu', 'Porunai Civilization'; Alexander Rea's contributions to Adichanallur's systematic excavations was delivered by him. The metallurgy theory was proposed by him for defining the technological advancement acquired by the Tamils. His inference on the Urn Burials, Reason for burying on mounted regions, deep analysis on arts inspired us. The Antelope, Alligator, Paddy, Dancing girl and horns in the pot was analysed by him. Dr.Satyamoorthy's report on Adichanallur and evidence for ancient residential areas was discussed by him. The Pre-creation of Classical Dance, Music and Arts by the Tamils along with Ornaments such as Anklets, Bangles; the use of Ocean currents by Sea Turtles was already known to the Tamils. The Musical words "Ka-ri-a-ra-va(na)-ta" from ash-printed urns excavations magical disappearance made us awestruck. The chemical processes of Smelting, Melting, Sublimation, Diamond Cutting was known to the ancient people of Tamilagam. The link between Keezhadi's graffiti marks of Fish, and Adichanallur's bronze punch marked coins with full-fledged fish symbol was a great inference by him. The state formation, the need for military and barracks was disclosed, and the failure of deciphering the musical urn by Dr.Sampath from Mysore was stated by him. He also added that the metal swords were used by Tamils with a sheer accuracy.

The chemical composition were already observed by them for making precious ornaments. The usage of Gold, Silver and Tin weren't difficult for them. The two types of Urn burials that are the Primary and Secondary was analysed with a lot of differences. The digging of hole for 12 to 13 feet, Iron materials, used gold ornaments, their belongings was used for wealthy people. He continued the speech with his reference to the Hero Stones, and strategy of North Indian Historians over Tamil's scripts for Ashoka's Brahmi script. The resource person concluded the speech by saying that it is the duty of a Historian to reconstruct the History. And that responsibility is within us!

The interaction session was held after the lecture where he explained his views on Pandyan symbol of fish, Capital shifting. Finally, the intellectual session came to an end with the Vote of Thanks delivered by Ms. T. Beatinal Amalorpava Mary.

"வாசிப்பதும், எழுதுவதும் இளைஞர்களின் வழக்கமாக வேண்டும். இலக்கியம் கூறும் அறம் வழி வாழும் படைப்பாளர்களாக மாணவர்கள் உருவாக வேண்டும். கல்வி வழி மனிதம் வளர்க்கும் தூய வளனார் கல்லூரியின் பணி போற்றுவதற்குரியது." என்றார் அவர்.

இசுலாமிய பெண்மணி ஒருவர் எழுதிய முதல் கவிதை; மருத்துவ சிகிச்சையிலிருந்து அப்படியே பயிற்சியில் பங்கேற்ற மாணவி; பகுதிநேர வேலைக்கும் சென்றாக வேண்டும் என்ற நிர்ப்பந்தத்தினாலே பயிற்சியில் பங்கேற்ற மாணவர்; குறிப்பிட்ட அரசியல் பத்திரிக்கை ஒன்றின் பெயரைக் குறிப்பிட்டு, அந்த இதழ் எங்கே கிடைக்கும் என்று விசாரித்த மாணவி ஒருவரது அரசியல் ஆர்வம்; பயிற்சியை முடித்த சூட்டோடு மாணவர் ஒருவர் தனது படைப்புகளை பதிவு செய்வதற்கென்றே பிரத்யேகமாக தொடங்கிய இன்ஸ்டாகிராம் பக்கம் என பயிலரங்கில் பங்கேற்ற மாணவர்களின் படைப்பிலக்கிய ஆர்வம் பிரமிப்பை ஏற்படுத்தின. மிக முக்கியமாக, இவர்களை பின்னிருந்து வழிநடத்தும் பேராசிரியர்களின் பங்களிப்பு குறிப்பிடத்தக்கது. போற்றதலுக்குரியது!

"இந்தக் காட்டில் எந்த மூங்கில் புல்லாங்குழல்?" என்ற, புகழ்பெற்ற கவிஞர் அமுதபாரதியின் ஹைக்கூ. கவிதைக்கு பதிலளிக்கும் விதமாக, "இங்கே வீற்றிருக்கும் மூங்கில்கள் அனைத்துமே நிச்சயம் புல்லாங்குழல்களாக மாறும்" என அனுபவப் பகிர்வில், முத்தாய்ப்பாய் பேசினார் மாணவி ஒருவர். அதனை மெய்ப்பிக்கும் வகையில், நறுக் வார்த்தைகளால் கட்டமைக்கப்பட்ட சமூக அவலங்களை சுட்டும் நேர்த்தியான ஹைக்கூ. கவிதைகள்; விமர்சன கண்ணோட்டத்தில் எழுதப்பட்ட அரசியல் கட்டுரைகள்; பெண் வாழ்வியலை மையப்படுத்திய சிறுகதைகள் என ஆக்ச்சிறந்த

ஃப்ளக்ஸ் பேனருக்கு மாற்றாக கோரைப்பாயில் பேனர்!

"ஃப்ளக்ஸ் பேனருக்கு கல்லூரி நிர்வாகம் தடைவிதித்ததைத் தொடர்ந்து, திண்டுக்கல் ஒவியக்கலைஞர் புஷ்பராஜ் பங்களிப்போடு, இந்த கோரைப்பாய் பதாகையை நிறுவினோம்" என்கிறார், பயிலரங்கின் ஒருங்கிணைப்பாளர் பேராசிரியர் ஜா.சலேத்.

ப்ளக்ஸ் பேனர்களால் சுற்றச்சூழலுக்கு ஏற்படுத்தும் பாதிப்பு அபாயகரமானது என்பதை சுற்றுச்சூழல் செயற்பாட்டாளர்கள் தொடர்ந்து எச்சரித்து வரும் சூழலில், மிக முக்கியமாக, முந்தைய காலகட்டத்தில் தூரிகை கலவலுர்களாக, கவரோவியக் கலவலுர்களாக வலம் வந்தவர்களை யெல்லாம், கண்ணாம்பு அடிக்கும் பெயிண்டர்களாக மாற்றிவிட்ட அவலத்திற்கு மத்தியில், ஃப்ளக்ஸ் பேனர்களை பயன்படுத்துவதற்கு கல்லூரி நிர்வாகம் விதித்திருக்கும் தடை முக்கியத்துவம் பெறுகிறது.

"ஆஹா! அற்புதம்!" என்ற வகையிலான வார்த்தைகளை உதிர்ந்துவிட்டு கடந்து செல்லாமல், அவரவர் தனது வரம்பிற்குட்பட்ட வகையில் ஃப்ளக்ஸ் பேனர்களின் பயன்பாட்டை தவிர்ப்பதே காலத்தின் தேவை.

பேரன்மீன் பெருமைக்குரியர்! வணக்கம்.

தென்னிந்தியாவில் தமிழ்நாட்டின் நடுப்பகுதியில் அமைந்துள்ள திருச்சிராப்பள்ளி மாநகரில் 'நன்மைக்கும் உண்மைக்கும்' என்னும் விருதுவாக்கோடு கல்விவழி மனிதம் மலரச் செய்யும் இலக்குடன் 180 ஆண்டுகள் கல்விப்பணி ஆற்றிவருகிறது தூயவளனார் கல்லூரி (தன்னாட்சி). மதுரை மறைமாநில சேக்சபையினரால் நடத்தப்படுகின்ற இக்கல்லூரியே, 2019இல் நடைபெற்ற தேசிய தரமதிப்பீட்டுக் குழுவின் (நான்காம்சுற்று) மதிப்பீட்டில் இந்திய அளவில் A++தகுதியைப் பெற்ற முதல் கலை மற்றும் அறிவியல் கல்லூரியாகும்.

தமிழகத்தில் உள்ள கல்லூரிகளுள் பல்கலைக்கழகமானியக்குழுவின் சிறப்புத் தொன்மைத் தகுதியைப் பெற்றுள்ள ஒரே கல்லூரி இதுவேயாகும். இத்தகு பெருமைமிகு கல்லூரியில் நூல்களை வெளியிடுவதிலும், தொடர்ந்து 'வளன்ஆயம்' ஆய்விதழை வெளியிடுவதிலும், ஆய்வுக் கருத்தரங்குகளை நடத்துவதிலும், முனைவர்பட்ட ஆய்வுகளை மேற்கொள்வதிலும் சிறப்புறச் செயல்படுகின்ற தமிழாய்வுத்துறை ஆண்டுதோறும் காலத்திற்கேற்ற பயனுள்ள தலைப்புகளில் கருத்தரங்குகளை நடத்தி வருகிறது. இத்தகைய ஆய்வுப் போக்கினைத் தொடர்ந்து பேணிக்காத்திடும் நோக்கில் 'தமிழ் இலக்கியத்தில் மேலாண்மை' என்னும் பொருண்மையில் தேசியக் கருத்தரங்கை 2024ஆம் ஆண்டு பிப்ரவரி திங்களில் நடத்துவதற்குத் தமிழாய்வுத்துறை விழைகின்றது.

கருத்தரங்கின் நோக்கம்

பொழுதுகளைப் போக்குவது மட்டுமல்ல வாழ்க்கை, மகிழ்ச்சியாகவும் அமைதியாகவும் தம் வாழ்நாளை நகர்த்துவதில் தான் வாழ்க்கையின் பொருள் பொதிந்துள்ளது. பழங்காலத்து மனிதனிடம் துளிர் விட்ட தலைமைப்பண்பும், நெறிப்படுத்தும் குணங்களுமே இயற்கையோடு இயைந்து வாழவும், வாழ்வில் எதிர்கொண்ட இடையூறுகளைக் களையவும் அவனுக்குத் துணைபுரிந்தன. வேட்டையாடி உணவை உண்ட பழங்கற்கால மனிதன் தொடங்கி நாகரிகத்தின் உச்சத்தைத் தொட்டுள்ள இன்றைய மனிதன் வரை ஒவ்வொருவரின் வாழ்விலும் மேலாண்மை என்பது இன்றியமையாததாகிறது. தனி மனித வாழ்விலும் சமூக வாழ்விலும் தம் செயல்களைத் திட்டமிட்டு முறையாக நடைமுறைப்படுத்தி நோக்கங்களை நிறைவேற்றி விரும்பத்தக்க இலக்குகளை எட்டுவதில் மேலாண்மையின் பங்கு முக்கியமானது.

இயற்கைநெறி வாழ்க்கையை மேற்கொண்ட சங்ககாலம் தொடங்கி, கணினித் தொழில்நுட்ப வாழ்க்கையை மேற்கொள்ளும் இன்றைய காலம் வரை தமிழ்ச்சமூகத்தில் மேலாண்மையின் பங்கு வியக்கத்தக்கதாக உள்ளது. உள மேலாண்மை, போர் மேலாண்மை, நேர மேலாண்மை, வணிக மேலாண்மை, நீர் மேலாண்மை, தொடர்பியல் மேலாண்மை,

Final Report of Each Technical Sessions Day I and Day II

TWO DAY National Seminar on “**Digital India: Progress towards Inclusive Fulfilment for Sustainable Development in the Digital Economy**”, 27 and 28 June 2023

REPORT OF THE TECHNICAL SESSIONS - DAY I (27 – 06 – 2023)

TECHNICAL SESSION I – Dr.M.Balasubramanian – Digital Applications and its impact on Indian Economy

Dr. M. BALASUBRAMANIAN, Assistant Professor, Centre for Ecological Economics and Natural Resources (CEENR), Institute for Social and Economic Change, Bengaluru. He stressed up on the report by economic analysts, the Digital India initiative could boost our GDP by around \$1 trillion by 2025. It can also be detrimental to play an important role in macroeconomic factors such as job creation, labour productivity, business development, and revenue generation.

He strongly stated that digital India will increase economic efficiency and competitiveness, creating new businesses and products, and addressing challenges relating to increasing financial inclusion, improving governance and reducing disparities. Finally, he highlighted that the impact of digitalization on India's economic growth has been positive. Even so, more work needs to be done so that everyone can benefit from digitalization opportunities. By addressing the challenges and investing in digital technologies, India can continue to drive growth and improve citizen welfare.

TECHNICAL SESSION II – Dr.K.AROCKIAM SJ, Digital Economy: Global and Local - view

Dr.K.Arockiam SJ, Assistant Professor, Department of HRM, St.Joseph's College (Autonomous), Tiruchirappalli - 2 was the speaker of this session. He highlighted the status Asia's e-commerce transactions account for 25% of the business to consumer (B2C) market in the world, led by the People's Republic of China (PRC), where companies like Alibaba and Tencent have grown at a break-neck pace. The transaction volume of the PRC's retail e-commerce market has increased from CNY1.32 trillion in 2013 to CNY5.33 trillion in 2016, with an estimated CNY7.57 trillion in 2017. He added that financial technologies have also given rise to new ways of delivering financial services in Asia, particularly in facilitating payment and lending; it promotes financial inclusion in many developing Asian countries. Fintech-based lending in Asia reached \$102.8 billion in 2015 while the proliferation of technologies further improved the efficiency of the payments system and strengthened Asia's position as the largest payments market in the world. Further, digitized, networked, and intelligent information and communications technologies (ICTs) enable modern economic activities to be more flexible, agile, and smart.

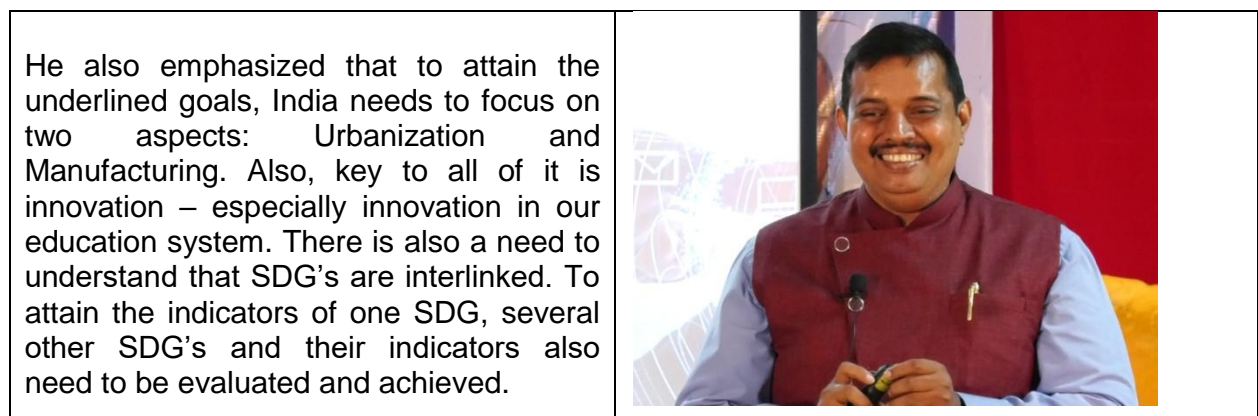

He pointed out that the digital economy has the potential to radically change the social environment and economic activities of Asia. It is already experiencing high growth, rapid innovation, and broad application to other economic sectors. However, despite the vast opportunities presented by the digital economy, Asia has not yet fully realized the potential of harnessing digital technology for sustainable development, due to (among others) poor ICT infrastructure, inadequate skills development, and socioeconomic barriers that prevent much of Asia's population from engaging in the digital economy.

He concluded with a remark that digital technologies can also transform markets and economic opportunities. In 2021, mobile technologies and services generated \$4.5 trillion of economic value added, or 5 percent of GDP, globally, but vulnerable populations in both developing and developed countries who are unable to connect to or use digital technologies risk being left behind in the post-pandemic recovery, leading to potentially heavier knock-on effects.

TECHNICAL SESSION III – Mr.V.SUJAI G PILLAI, Opportunities of Digital India towards the fulfillment of SDGs 8

Mr. SUJAI G PILLAI, MYGOV AMBASSADOR, Founder of Mandapam.com (MANDAP), 2Tion.com, startupcell.org, Thiruvananthapuram, India, He elaborated the India has embarked on the journey to attain the SDG goal 8 Decent Work and Economic Growth for all. Programmes like Make in India, Startup India, Skill India, Digital India have the underlining principle of creating employment opportunities for the country's youth. Government is laying immense emphasis on creating conducive trade and business environment.

Economic growth is one of the central tenets of SDG 8. India has been growing at the rate of 7.5% per annum. However, the aim is to grow at the rate of 9-10% per annum. India's growth story has been driven by the services sector which constitutes 62% of India's GDP. Dependence on the services sector alone for growth is possible in countries with high per capita income and less population. However, if one takes the example of China, Japan, South Korea, process of manufacturing is essential to growth and in turn for creation of jobs. India needs to focus on the same.

Infrastructure support, innovation, skill formation are other interventions much required in India. India can also use the potential of FDI to crowd in more of domestic investments can be enhanced by pushing it in either export orientation or in import substitution so that then it would only be crowding in rather than crowding out. Thus, revival of industrial policy for strategic import substitution using these initiatives can be useful for India and realizing the vision of SDG's in the country.

Finally, he concluded that the Government and private sector are also working together to provide best of training instructors, teachers to students in remotest districts. This is being done using satellites and other expensive instruments in 52 ITI's using CSR funds of private sector industries involved. Other initiatives include skilling people who belong to the BPL category. Focus is on gender equality and an innovative project called Skill Sakhis has been launched in Nagpur, Amravati and Aurangabad along with UNDP. Through this one skill sakhi is allotted two villages. She goes to the village, she talks to the girls, she gives them the preferences, takes their choices and ultimately she connects with the industry with the help of the government and then that particular girl is being skilled and trained in a trade of her choice

TECHNICAL SESSION IV – Dr.A.VIMAL JERALD, Digital Technology: Prospects and Challenges

deployment of digital solutions and Collaborating with stakeholders, including governments, businesses, and communities, to address the challenges collectively.

Governments play a crucial role in addressing the challenges of digital technology. Initiatives may include funding research and development, promoting digital infrastructure, and creating policies for data protection and cyber security. Collaboration between industries and technology providers can drive innovation and address sector-specific challenges.

Finally he concluded with the remark that the future of digital technology holds promising advancements such as 5G connectivity, Internet of Things (IoT), virtual reality (VR), and augmented reality (AR). Digital technology offers tremendous prospects for growth, innovation, and connectivity. However, it is crucial to address the associated challenges to ensure a secure, inclusive, and ethical digital future. TECHNICAL SESSION IX - Dr.V.SIVASANKAR – Digital Economy and Digital Skills deliverance

Dr.V.SIVASANKAR. Associate Professor, Department of Economics, School of Management Studies, Pondicherry University, Pondicherry - 605 014, India narrated that the COVID-19 pandemic has boosted digitization. But it has also exposed severe challenges in connecting households and people, as well as the need for digital skills to participate effectively in the online world. Demand for digitally skilled workforces and the need for a digitally competent population have increased in the face of the pandemic.

Digital skills are key to digital transformation and a significant enabler of each country's digitization. Instilling the necessary skills has become a key part of national digital transformation strategies. Strengthening digital skills will narrow the global digital divide. Among the main reasons why people are not using the Internet in developing countries is the lack of capacities and skills, either to use technologies or to benefit from the information and services available online.

Enhancing citizens' digital capacities serves to boost Internet use. Digital skills have never been more in demand. Microsoft estimates up to 149 million new technology-related jobs could appear by 2025 in fields such as advanced IT, computer programming, and scientific research and development. By learning digital skills now, workers can access jobs in different fields with better pay and prospects, participate in the global digital economy, and potentially reduce the risk of their jobs becoming automated by as much as 59%.

THEMES FOR PAPER PRESENTATION

India made its presence felt at international level since the beginning of 21st century just because of successful handling of the emerging but challenging new computerized era. Now with the base for computers and telecommunications well established the parameter of future economic growth will be guided by digitization of processes by use of computer based communications aspects.

In this background the prime minister of India Shri. Narendra Modi launched on 1st July 2015 a campaign "Making India Digital". The campaign aimed to connect rural areas with high speed internet network and to improve the digital literacy.

As per August, 2017 data digital payment with the transaction volume of digital transactions increased to Rs. 883.42 million post demonetization which would, otherwise, have taken three years to achieve this milestone. The point to make is that online purchase and digital payments is creeping in very fast in all fields of life and it has started posing challenge to the physical merchants and traders. Thiruppugazh, IAS, Chairman, Mitigation and Management of Floods in Chennai Metropolitan, an illustrious alumnus of the department of Physics who himself belonged to first autonomous batch (1978-1981). Some of the notable alumni like Dr. Venkatraman, Director, Indira Gandhi Centre for Atomic Research, Kalpakkam, a classmate of Dr. V. Thiruppugazh were also among the invited guests.

The programme began with a prayer song and Tamil Thai vazhthu. Dr. I. Johnson, Head & Associate Professor of Physics, welcomed the gathering. Rev. Dr. Pavulraj Michael SJ Rector, St. Joseph's College honored the chief guest with a garland. Rev. Dr. K. Amal SJ Secretary, St. Joseph's College, adorned the chief guest with a shawl and Rev. Dr. M. Dr. V. Thiruppugazh delivered the first autonomous first batch Physics students' endowment lecture on the title "Disaster risk reduction-role of students". He, introduced the topic by raising five questions namely What is disaster? What is risk what is risk reduction why risk reduction and how to reduce risk? Later he pointed out the reasons for disaster and distinguished between a disaster and an accident. He compared the disaster management of various countries and shared his experiences. He revealed to the audience that the number of deaths due to road accidents is 510 time greater than that of natural disasters and advised the students to follow the traffic rules. Finally, he listed and expounded the various roles that a student can take part as a volunteer, taking internships, doing project on risk assessment and so on. At the end of the lecture, several questions were raised by the students and Dr. V. Thiruppugazh addressed them and helped student understand various concepts quite easily.

திருச்சி செயின்ட் ஜோசப் கல்லூரியில், தன்னாட்சி அடைந்த 1978-ம் ஆண்டுபயின்ற இளநிலை இயற்பியல் மாணவர்கள் மன்றம் சார்பில் கருத்தரங்கு நேற்று நடைபெற்றது.

கல்லூரி முதல்வர் சேவியர் ஆரோக்கியசாமி தலைமை வகித்தார். கல்லூரி அதிபர் பவுல்ராஜ், செயலர் அமல் ஆகியோர் வாழ்த்திப் பேசினர். இணை முதல்வர் ராஜேந்திரன் கலந்துகொண்டார்.

இக்கருத்தரங்கில் சிறப்பு விருந்தினராக கல்லூரியின் முன்னாள் மாணவரும், சென்னை பெருநகர வெள்ள அபாயத்தைத் தணித்தல் மற்றும் மேலாண்மையின் தலைவருமான ஓய்வு பெற்ற ஐஏஎஸ் அதிகாரி திருப்புகழ் கலந்துகொண்டு, 'பேரிடர் அபாய குறைப்பில் மாணவர்களின் பங்கு' என்ற தலைப்பில் பேசியது:

↑ கருத்தரங்கில் பேசிய ஓய்வுபெற்ற ஐஏஎஸ் அதிகாரி திருப்புகழ்.

பூமியின் நீர், நிலம் மற்றும் சூழ்நிலையியல் அமைப்புகளில் சில மாற்றங்கள் இயற்கையாகவே நிகழும். அவற்றில் நிலநடுக்கம், புயல், சுனாமி ஆகியவை பெரும் பாதிப்புகளை ஏற்படுத்துகின்றன. இவற்றுடன் இயற்கை சூழ்நிலைக்கு முரண்பட்ட கட்டிட அமைப்புகள், வாழ்வியல் முறைகள் ஆபத்துகளையும், இழப்புகளையும் மேலும் அதிகரிக்கின்றன. இவ்வாறு இயற்கையின் நிகழ்வுகள்

பேரிடர்களாய் மாறுகின்றன.

இந்தியாவைக் காட்டிலும் மற்ற வளர்ந்த நாடுகளில் கடந்த 50 ஆண்டுகளில் ஏற்பட்ட பேரிடர்கள் அதிகம். ஆனால், அவர்களின் உயர்ந்த பேரிடர் மேலாண்மை, மீட்டெடுக்கும் திறனால் இழப்புகள் குறைவு. இயற்கை பேரிடர்களால் ஏற்படும் உயிரிழப்புகளைக் காட்டிலும், மனிதர்களின் கவனக்குறைவாலும், அலட்சியத்தாலும் ஏற்படும் உயிரிழப்புகள் அதிகம்.

பேரிடர் மேலாண்மையில் இயற்பியலின் பங்கு அதிகம். எனவே மாணவர்களுக்கு பேரிடர் மேலாண்மை பற்றிய அறிவை பாடங்கள் மற்றும் பயிற்சிகள் மூலம் வளர்க்க வேண்டும் என்றார்.

முன்னதாக, இயற்பியல் துறை தலைவர் ஜான்சன் வரவேற்றார். இயற்பியல் மன்ற செயலாளர் தினகரன் நன்றி கூறினார்.
